

BFC Thread colors in 1000m cones being retired 4/15/201

When we first started selling our own brand, BFC, machine embroidery thread we too two things into consideration. One was the Admelody colors we had been using in our designs and colors that Fred and I wanted that weren't in Admelody. We've been working with these colors for several years and we would like to add additional colors. But since our inventory is already so large with 360 colors, we looked to see if we could eliminate any colors. We have found 30 pairs of colors that are almost identical. The list below shows the colors Being Retired on the left and the color to substitute on the right. Once we have cleared this inventory we can look at what great new colors to add! PLEASE NOTE: Due to inventory availability we have reversed 2829 and 2828. We will be retiring 2828.
